SUMMARY

Third-year B.Tech Computer Science and Engineering student with hands-on experience in Python, JavaScript, web development, machine learning, and LLM-based applications. Developed and deployed a smart attendance management system and placed in the Top 6 at the AISEHack 1.0 national-level hackathon. Interested in building practical software solutions and strengthening software engineering and problem-solving skills.

EDUCATION

B.Tech — Computer Science and Engineering | 2024–2028 — Malla Reddy College of Engineering, Hyderabad (Affiliated to Jawaharlal Nehru Technological University Hyderabad)

Intermediate (MPC) | 2022–2024 — Gauthami Junior College

CBSE — Class X | 2022 — Radcliffe School

TECHNICAL SKILLS

Programming Languages: Python

Web Development: React, JavaScript, HTML, CSS

Databases & Deployment: Firebase Firestore, Firebase Hosting

AI & Machine Learning: LightGBM, XGBoost, CatBoost, PyTorch, Graph Neural Networks, Optuna, RDKit, Deep Learning

AI Applications & Platforms: LLM Agents, Groq API, Hindsight Agent Memory, Kaggle

PROJECTS

Roll Call — Smart Attendance Management System

React · JavaScript · Firebase Firestore · Firebase Hosting

- Developed and deployed a web-based application for recording and managing daily student attendance.
- Implemented separate workflows for class representatives and faculty, including PIN-secured access and a department-restricted, read-only faculty view.
- Integrated real-time attendance data handling, roster management, attendance analytics, and monthly attendance exports.
- Deployed and maintained the application on Firebase Hosting for use across all six CSE department sections.

Sales Memory Agent — Hindsight × CascadeFlow Hackathon

June 2026 · Python · Groq (Llama 3.3 70B) · Hindsight Cloud · hindsight_client SDK

- Built an AI sales agent that retains and recalls customer objections across sessions using Hindsight persistent memory.
- Integrated Groq's Llama 3.3 70B model to draft objection-aware follow-ups and configured API key handling through environment variables.

EXPERIENCE

Python Programming Intern (Virtual) — CodeOrbit Tech, Batch 8 | 1–30 October 2026 · Upcoming · Assignment-driven virtual internship

- Selected for a one-month, assignment-driven Python Programming internship with CodeOrbit Tech's Virtual Internship Program.
- Scope includes completing assigned Python projects, publishing source code with documentation on GitHub, and presenting a project demo.

CERTIFICATIONS & ACTIVITIES

- IBM: Getting Started with Artificial Intelligence; Getting Started with Generative AI.
- Digital Productivity with AI — UNICEF YuWaah / Passport to Earning.
- Participation certificates: Walmart, ISRO, and Innovatexpress.
- Coordinator, DB-Club; Participant, Java Club — college certificates.

ACHIEVEMENTS

- Top 6 — AISEHack 1.0 National-Level Hackathon (Team XD), among 5,000 participating teams.
